DETAILED ACTION

1. This restriction is in response to the amendment filed February 11, 2004.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, directed to a light emitting diode, classified in class 257, subclass 13; and
 - II. Claims 7-17, directed to a method for manufacturing a light-emitting diode, classified in class 438, subclass 22.

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). The reason for the restriction is because, the process can be used to make a different product such as a product not having the step of "cutting the light emitting structure into plural units so that each of the light emitting structures has a designated size."

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 2822

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
